Cisco Aironet Product End of Life Announcement

August 3, 2001

40-Bit WEP Products

Cisco Systems is committed to providing customers with the highest level of security available. Consistent with this, we are discontinuing all 40-bit encrypted products. Because our products are classified by the United States Department of Commerce as being "retail" products, Cisco does not differentiate between 40- and 128-bit encrypted products. Therefore, Cisco holds no export limitations on 128-bit encrypted products that are not equally applicable to 40-bit encrypted products.

Cisco Aironet 340 Series Products

In most cases the Cisco Aironet® 350 Series represents a superset of hardware and software functionality relative to the Cisco Aironet 340 Series. To simplify ordering and decrease the SKU count supported by both Cisco and its distribution and reseller partners, Cisco is discontinuing many products in the Cisco Aironet 340 Series family. In most countries, these discontinued products have direct replacements in the Cisco Aironet 350 Series family. However, in the countries Argentina, Chile, China, Cyprus, Mexico, Peru, Poland, Romania, Russian Federation, Slovenia, Taiwan and Thailand, direct replacement 350 series products have not yet been certified. There is no impact on the functionality of the Cisco Aironet product family that results from this discontinuation. Products specifically excluded from this discontinuation are the Cisco Aironet 340 Series Bridge (AIR-BR342), Cisco Aironet 340 Series Access Points (AIR-AP342E2C and AIR-AP342E2R) and the Cisco Aironet 340 Series Ethernet Uplink Base Station (AIR-BSE342).

Cisco 4800 Series Universal Client and Multi Client

The Cisco Aironet 350 Series Workgroup Bridge is a functional superset of both the AIR-UC4800 and the AIR-MC4800. The Cisco Aironet 350 Series Workgroup Bridge shares the same operating system and user interface as the UC and MC4800. The Cisco Aironet 350 Series replacement product offers the advantages of supporting eight MAC addresses relative to one for the UC and four for the MC as well as a greater selection of antenna options.

Power Injector

The AIR-PWRINJ= Power Injector is a functional superset of the 110-220V Power Injector AIR-PWRINJ1= which is used by Cisco Aironet 350 Series Access Points and Bridges. The new power injector incorporates a protection circuit; protecting devices that don't require, or cannot accept, power over Ethernet.
